

Smart Site Protection[™]

Elevate your Alarm Management System to
Reduce False Alarms, Improve Response
Times and Increase Situational Awareness.

Cost-Effective Solution: Leverage existing security cameras to seamlessly integrate Smart Site Protection with Envysion and turn any camera into an analytics enabled smart device for security. No additional equipment is required.

Reduce False Alarms and Dispatch Fees: Confirm an alarm event before notifying emergency personnel to decrease false alarm dispatches and financial penalties.

Improve Emergency Response Times: Threats to property, especially when it is authenticated and in progress, are considered a high priority by emergency services. Quicker response time leads to increased apprehension rates and reduced property losses.

FALSE ALARM

95% of Alarms are False¹

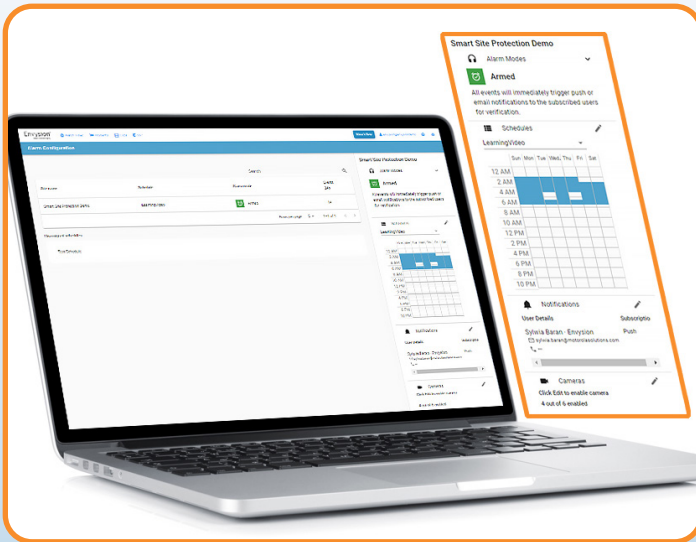

Incremental false alarms fees add up quickly. Avoid involving emergency personnel unnecessarily with Smart Site Protection. Personalize your own workflow for receiving and reacting to push notifications for instant verification and quick response.

Smart Site Protection, technology that works best, when you're not watching.
